

Orbi Pro SRR60 screens, 2 March 2022, 1400 hours local.

Connected Devices

All three satellite devices are shown as connected. Two of the satellites are linked through the third.

Advanced Firmware Update Status

I tried to update the firmware of the system. The router and one of the satellites updated. The other two satellites are “Waiting for connection”, which makes no sense given their connected status from the previous screen

	Model Name	Device Name	Current Version	Status
Router	SRR60	SRR60	V2.7.1.108	No new firmware version available.
Satellite	SRC60	Ceiling Orbi Pro-1	V2.6.2.200	Waiting for connection
Satellite	SRS60	Orbi Pro Satellite-1	V2.7.1.108	No new firmware version available.
Satellite	SRS60	Orbi Pro Satellite-2	V2.6.2.200	Waiting for connection

Advanced Firmware Manual Update Status

I downloaded the firmware files from the Netgear Orbi website. The two satellites that are not directly connected to the router do not show up to allow them to be updated.

Online Update | **Manual Update**

Firmware Update

To update Orbi router, locate and select the update file on your disk.

Browse **Upload**

To update Orbi satellites, select the device then click the Update button to continue.
