

Start with all devices powered OFF

AT&T ONT

Your "Dumb" Gigabit Switch

Your Third Party Router

AT&T Gateway

Connect Ethernet cables from ONT to Switch and to AT&T Gateway and then follow the steps

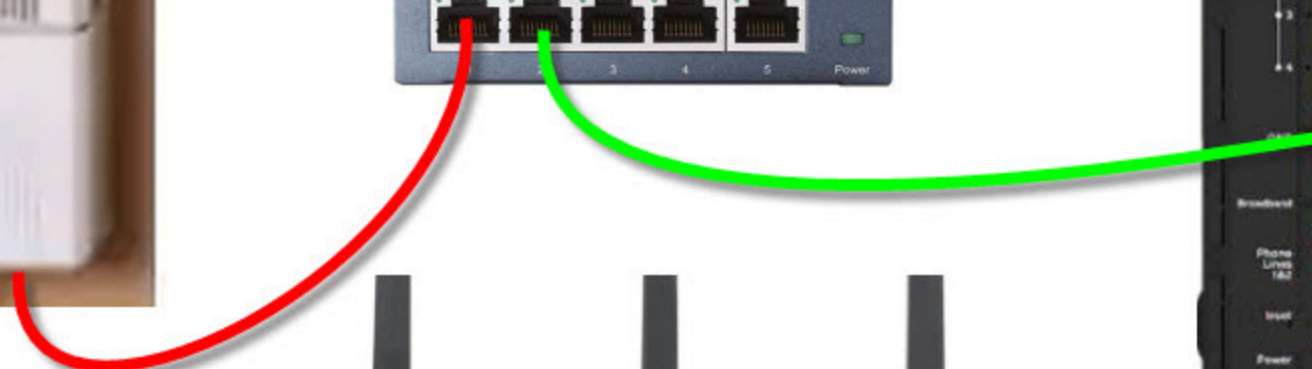

1 Power on ONT first - wait 2 mins for it to connect

2 Then power up switch

3 Power up AT&T Gateway and wait for solid Broadband Light

4

Leave ONT powered ON

5

Leave switch powered ON and disconnect Ethernet Cable from Gateway and plug it into your router's Internet or WAN port

6

Power on your router and wait 2 mins for it to be ready

7

Power off AT&T Gateway, unplug power supply and store both pieces away
