

The model is DGN2200v4 a N300 wireless ADSL+modem router

The **Firmware Version** is V1.0.0.98_1.0.98

The firmware upgrade assistant

The screenshot shows the Netgear Genie web interface. At the top left, the logo "NETGEAR genie™" is displayed, with the model number "DGN2200v4" below it. On the top right, there is a "Logout" button, a "Firmware Version" dropdown menu showing "V1.0.0.98_1.0.98", and a language selector set to "English". A navigation bar contains "BASIC" and "ADVANCED" tabs. A blue notification bubble above the "ADVANCED" tab reads "A router firmware upgrade is available." Below the navigation bar, a sidebar on the left lists "ADVANCED Home", "Setup Wizard", and "WPS Wizard". The main content area is titled "Firmware Upgrade Assistant" and displays the message "Attempting to connect to Netgear Server. Please Wait..."

This screenshot shows the "Firmware Upgrade Assistant" page during the upgrade process. The "ADVANCED" tab is selected, and the blue notification bubble "A router firmware upgrade is available." is present. The main heading is "Firmware Upgrade Assistant". Below the heading, a progress bar is shown with the text "Upgrading Router Firmware now. Please Wait...". A note states: "Note: It will take about 1.5 minutes for firmware upgrade. Please don't turn off the power or press reset button." To the right of the note, there is a text input field and a file upload area with a folder icon.

Hmm. We're having trouble finding that site.

We can't connect to the server at www.routerlogin.net.

If that address is correct, here are three other things you can try:

- Try again later.
- Check your network connection.
- If you are connected but behind a firewall, check that Firefox has permission to access the Web.

Try Again
