

The Extender was not able to connect to your existing network.

Please re-enter the passphrase and try again.

Selected Network: SHELL AF144B

Security Protocol: WPA2-PSK [AES]

Password (network key):

If you entered the correct passphrase, and the Extender did not connect to your existing wireless network, you might need to move the Extender closer to your router or to a position with a better line of sight. Check the Extender LEDs to isolate the problem. The LEDs are explained in the installation guide and user manual for your product.

If you have Access Control List (ACL) enabled in your router, please make sure you have added below MAC address into your router's Access Control List (ACL).

The Extender MAC addresses are 02:0F:B5:80:E6:57 3E:37:86:80:E6:57 3E:37:86:80:E6:56 Your wireless adapter MAC address is 02:0F:B5:90:BB:54 Click Cancel to select a different network.
