

# ATTIVITA' ESEGUITE PER ATTIVAZIONE VPN

**Attivato il servizio VPN e Scaricati i files di configurazione cliccando sul bottone: "Per Windows" e copiati in C:\Program Files\OpenVPN\config**

**Cambiato nome alla connessione VPN**

**Scollegato dalla rete lan del router, tentato la connessione, appaiono questi errori:**

Tue Sep 22 23:03:31 2020 WARNING: Compression for receiving enabled. Compression has been used in the past to break encryption. Sent packets are not compressed unless "allow-compression yes" is also set.

Tue Sep 22 23:03:31 2020 DEPRECATED OPTION: --cipher set to 'AES-128-CBC' but missing in --data-ciphers (AES-256-GCM:AES-128-GCM). Future OpenVPN version will ignore --cipher for cipher negotiations. Add 'AES-128-CBC' to --data-ciphers or change --cipher 'AES-128-CBC' to --data-ciphers-fallback 'AES-128-CBC' to silence this warning.

Tue Sep 22 23:03:33 2020 WARNING: No server certificate verification method has been enabled. See <http://openvpn.net/howto.html#mitm> for more info.
